Technical Product Manager

(all genders)

Papertech is the leading provider of camera-based solutions for paper, board, pulp and tissue machines, with more than 1,600 installations in over 60 countries. Papertech's unified platform combines event monitoring (WMS Web Monitoring System) and web inspection (WIS Web Inspection System) in a single, non-proprietary platform, helping paper, tissue, board and pulp manufacturers worldwide optimize product quality and production efficiency. IBS Papertech GmbH (Teufenbach-Katsch) and Papertech Inc. (Vancouver, Canada) are part of the IBS Paper Performance Group.

WHAT WE OFFER

- The opportunity to contribute your expertise and commitment and grow together with us
- Company mobile phone and laptop
- Work location: Teufenbach and/or Graz
- Gross monthly salary starting at €4,200
- Higher remuneration depending on qualifications, performance and professional experience

YOUR PROFILE

- Technical education (e.g. electrical engineering, mechatronics, automation or computer engineering) or equivalent practical experience.
- Knowledge of camera technology, optics, lighting, image processing, and PC, server and network systems.
- A hands-on approach; experience in industrial machine vision, camera/inspection systems and hardware/software integration is an advantage.
- Structured working style, enthusiasm for testing and troubleshooting, and strong communication skills.
- Very good German and English skills and willingness to travel internationally for business.

YOUR RESPONSIBILITIES

- Evaluate, test and integrate cameras, optics, lighting, servers and other hardware components into existing systems.
- Gather technical requirements, specify solutions and coordinate the further development of our camera and inspection systems.
- Sample testing: test customer and material samples under realistic operating conditions, evaluate results and document findings.
- Support Factory Acceptance Tests (FAT), customer trials, technical fault analyses and commissioning of customized solutions.
- Collaborate with suppliers, technology partners and international development, sales and service teams.
- Assess the technical feasibility of customer requirements, ensure system documentation and handovers, and monitor emerging technologies.
